Amazing Hedge Mazes. World Atlas is an extraordinary illustrated journey through the world's most fascinating hedge mazes: living works of art where architecture, nature, history and mystery meet. From ancient myths to Renaissance gardens, from European castles to remote parks in Asia, Africa, the Americas and Oceania, the author Ettore Selli guides readers through a unique global heritage: the green labyrinth. The book brings together hundreds of remarkable examples selected after years of research, travel and exploration, offering a new perspective on one of humanity's most enduring symbols. More than a visual atlas, this volume is an invitation to discover the hidden language of mazes. Each layout tells a story: of power, beauty, ingenuity, play, spirituality and the inherent desire to lose oneself, with the ultimate goal of finding a way out. With maps, photographs, historical notes and architectural insights, Amazing Hedge Mazes. World Atlas reveals the complexity and wonder of these living monuments, from the most celebrated historic mazes to little-known creations scattered across the planet. A book for garden lovers, travellers, architects, designers, puzzle enthusiasts and anyone fascinated by places where imagination becomes landscape.
